

Sujit Chaudhary

AI/ML Engineer | Data Analysis | Machine Learning

Kathmandu, Nepal | +977-9823202712 | chaudharysujit765@gmail.com

[linkedin.com/in/sujitchaudhary2005](https://www.linkedin.com/in/sujitchaudhary2005) | github.com/sujitchaudhary2005 | sujitchaudhary.tech

PROFESSIONAL SUMMARY

AI/ML engineer and full-stack developer with experience shipping production-grade applications, data pipelines, and AI-integrated systems. Proficient in Python, data analysis, and machine learning fundamentals. Consistently leverages AI-assisted development tools (Cursor, Claude, GitHub Copilot) to accelerate delivery and improve code quality. Secured 2nd Runner-Up at Protobytes 2.0 Hackathon with a fintech infrastructure project. Maintains 100+ GitHub commits across structured, documented repositories.

TECHNICAL SKILLS

- **Languages:** Python, C, C++, JavaScript, TypeScript
- **AI and ML:** Data Preprocessing, Exploratory Data Analysis (EDA), Feature Engineering, Machine Learning Fundamentals
- **AI Development Tools:** Cursor, Claude, GitHub Copilot, Prompt Engineering, AI-Augmented System Design
- **Libraries:** NumPy, Pandas, Matplotlib, Seaborn
- **Web and Backend:** Next.js, React, Tailwind CSS, Node.js, REST APIs, Supabase (PostgreSQL)
- **Architecture:** System Architecture and Design (SAD), Multi-Tenant Systems, Offline-First Architecture, Ed25519 Cryptography
- **Tools:** Git, GitHub, VS Code, Jupyter Notebook, Vercel, Claude Code
- **Other:** IndexedDB, Dexie.js, HTML5, CSS3

PROJECTS

UPA-NP (Unified Payment Address for Nepal) | SaralPay

2025

Next.js 15, TypeScript, Supabase, Ed25519 Cryptography, Dexie.js | Protobytes 2.0 Hackathon, 2nd Runner-Up

- Engineered a unified payment interoperability protocol connecting 4+ isolated platforms (eSewa, Khalti, Fonepay, Connect IPS) into a single structured layer
- Reduced manual reconciliation effort for government offices from hours to near-zero through real-time auto-reconciliation via Supabase Realtime
- Implemented Ed25519 digital signatures enabling cryptographically verified offline payments with zero server dependency
- Architected offline-first transaction queue using IndexedDB (Dexie.js) that auto-syncs 100% of queued transactions on reconnect
- Enforced nonce-based replay protection at both database constraint and API level, eliminating duplicate transaction risk

BaaS | Personal Freelance Backend Infrastructure

2025 (In Progress)

Node.js, PostgreSQL, REST API, Multi-Tenant Architecture | Cursor, Claude, GitHub Copilot

- Designing a reusable backend layer that serves 1 shared codebase to multiple freelance clients with fully isolated data environments
- Architecting multi-tenant separation to eliminate duplicated infrastructure across client projects, targeting 60%+ reduction in setup time per new client
- Developing modular REST API endpoints and reusable service logic to accelerate delivery from requirements to deployment
- Applying AI-assisted system design using Cursor and Claude across architecture planning, code generation, and review

AI/ML Learning Journey Repository

2024 to Present

Python, NumPy, Pandas, Matplotlib, Seaborn, Jupyter Notebook

- Produced 10+ structured topic notebooks covering Python, NumPy, Pandas, and data visualization with reproducible workflows
- Performed data cleaning, EDA, and feature exploration on 3+ real-world datasets including the Titanic dataset
- Maintained 100+ documented commits with beginner and intermediate versions of each topic in separate notebooks

CLI Banking System | College Project

2024

C++, Object-Oriented Programming, File I/O

- Developed a command-line banking application in C++ supporting 5 core operations: account creation, deposit, withdrawal, balance inquiry, and transaction history
- Applied OOP principles including classes, inheritance, and encapsulation across a 3-layer modular architecture
- Implemented persistent file-based storage maintaining accurate account records across 100% of sessions without data loss

Personal Portfolio Website

2024 to Present

React, Tailwind CSS, Vercel | Cursor, Claude

- Designed and deployed a personal portfolio site on Vercel using React and Tailwind CSS, achieving sub-2-second load times
- Showcases 3 projects and technical skills as part of a public developer growth journey toward AI-focused engineering

EDUCATION

Bachelor of Science in Computer Science and Information Technology (BSc CSIT)

Expected 2027

Tribhuvan University | Nepalaya College, Kathmandu, Nepal

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate
- Elements of AI - University of Helsinki
- Scientific Computing with Python - freeCodeCamp
- Data Manipulation, Cleaning and Joining with Pandas - DataCamp
- Exploratory Data Analysis in Python - DataCamp
- Data Visualization with Matplotlib and Seaborn - DataCamp
- Importing and Working with Data in Python - DataCamp

HACKATHON EXPERIENCE

Protobytes 2.0 Hackathon | 2nd Runner-Up

2025

- Ranked 2nd Runner-Up out of all competing teams for UPA-NP, a fintech payment infrastructure project
- Delivered a working full-stack prototype with cryptographic offline verification within a 24-hour time constraint
- Presented and defended technical architecture, design trade-offs, and scalability strategy to a judging panel

ADDITIONAL INFORMATION

- Actively seeking AI/ML, Data Analyst, or Software Engineering internship roles (remote or on-site)
- President, Nepalaya IT Club - Nepalaya College, Tribhuvan University
- Applies AI-assisted development workflows on every project: Cursor for coding, Claude for system design, GitHub Copilot for code generation
